To Whom It May Concern,

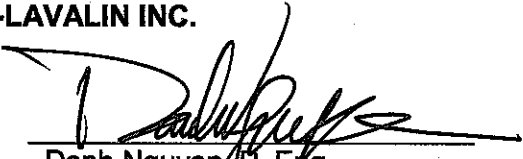

For more than 12 years, we have been working with Mr. John Shames of International Innovative Systems (IIS) and incorporating IIS transient voltage surge suppression (TVSS) devices in our designs of 600VAC and 120/208VAC electrical power distribution systems for commercial, institutional and healthcare facilities. To date, we have not experienced any failure or problem with the IIS products installed in our projects.

We have full confidence of the quality of IIS products and, more importantly, the knowledge and inputs Mr. Shames brings to our designs. We recommend the use of International Innovative Systems TVSS devices.

Yours truly,

LKM Division of
SNC-LAVALIN INC.
